KILLS TO **LOG 5** 99.999% OF BACTERIA IN AS LITTLE AS **THREE** MINUTES

Fantex Disposable Cubicle Curtains
Proven to kill to log 5 (99.999%) in as little as 3 minutes.

Most medical curtains will inhibit and reduce bacterial growth whereas our curtains will also <u>kill</u> the pathogens.

Test Results
Fantex HAI prevention curtains were independently tested for MRSA alongside nano-silver curtains based on ISO 20743: 2007. Fantex was clear and had zero growth under the fabric, whereas the curtains containing nano-silver presented with heavy growth under fabric and had still been unable to eliminate contamination after 24 hours, posing a HAI threat.

100% Recyclable

Light Weight & Easy to install

Antimicrobial

Asset to any Hospital

Feedback
85% of hospitals that have switched to Fantex have observed a reduction in HAIs within one year.

Features
- Proven to kill to log 5 (99.999%) in as little as 3 minutes.
- Proven to protect for up to 12 months against MRSA and 6 months against C. difficile, E. coli and C. albicans
- Ultrasonically welded Uni-fit loop on every second pleat, halves curtain changeover time
- Each curtain can be dated when hung
- The ability to reduce ICU stays
- Biocidal, virucidal and sporicidal properties
- Marine Grade Fire Retardancy IMO FTPC Part 7
- TGA certified
- Conforms to ISO 9001, EN Standards for continual improvement
- Manufactured in the UK

Very High Risk
Outbreak of unkown infectious disease, Gastroenteritis, Clostridium difficile.
Carbapenem - Resistant Enterobacteriaceae.
Wards managing patients with novel or highly transmissible communicable diseases

High to Very high Risk
Hamematology/Oncology Units

High Risk
Intensive Care Units, High dependency Units, Emergecy departments, Renal Units, Operating Suites, Wards for patients requiring contact precautions e.g. VRE, MRSA, E .coli, S .aureus, MRGN

Significant Risk
General Wards, Nursing homes, Aged care facilities

Low Risk
Rehabilitation, Office based practices, long term care

* Curtains to be replaced as directed by Infection Prevention and Control Department
