## Expandable Bariatric Ward Bed

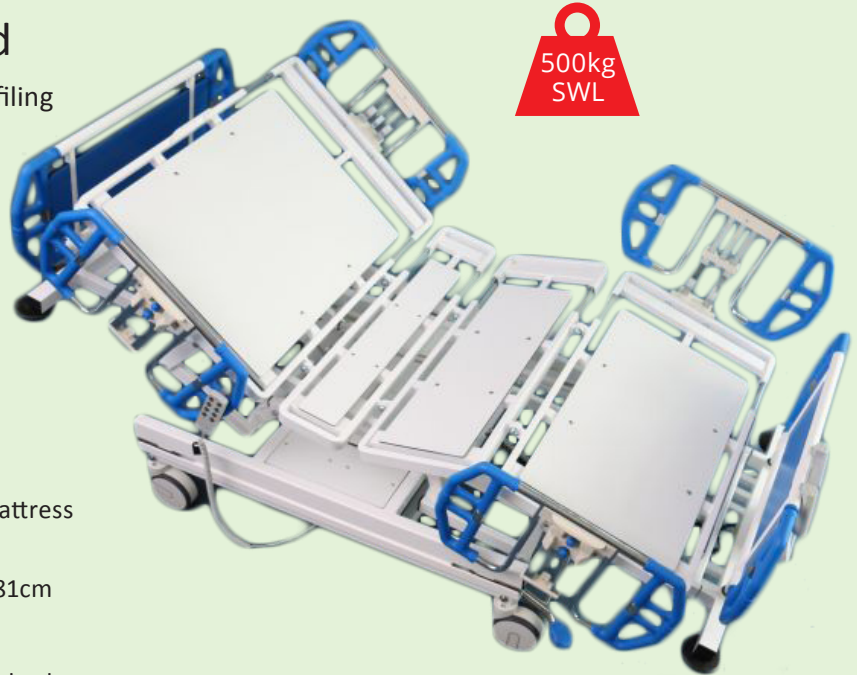

### Expandable Bariatric Ward Bed

This is a bariatric four-section, fully-powered profiling bed. The mattress platform can both expand in width and extend in length to provide greater room to comfortably accommodate and reposition a bariatric patient.

#### Features:

- Max patient weight – 450kg
- Three position expandable mattress platform – 90cm/105cm/120cm
- Retractable leg extension – Increases length of mattress platform from 200cm to 220cm
- Electrically height adjustable – min 41cm to max 81cm
- Floor clearance of 16.5cm – hoist compatible
- Three position brake, at foot end, accessible from both sides
- Four section electrically powered profiling frame
- Three position height adjustable side rails that can also be removed, if necessary
- Easily detachable head and foot boards
- Patient hand pendant to adjust bed height, backrest, knee break & chair position
- Supervisor/carer control panel with all the functions on patient hand pendant, plus tilt, cardio chair & 'N' (returns mattress platform to a horizontal position, at lowest height).
- Trendelenburg, Reverse Trendelenburg and chair position functions
- Lock out functions on both carer control panel and patient hand pendant
- Battery backup for all electrically powered functions
- Twin 150mm castors for increased manoeuvrability
- Protective corner bumpers
- Discreet nighttime down light reduces risk of trips and falls for nursing staff
